Understanding And Supporting Children With Emotional And Behavioural Difficulties

Ready-to-implement resources and approaches for effective professional care in school and clinical settings. The reverberations of autism spectrum disorders among parents and siblings can be complex. Parents may grapple with the impact of their child’s initial diagnosis, wrestle with the tension between their professional ambitions and family obligations, and labor to maintain a healthy union with their partners. Brothers and sisters may be given less attention, asked to assume a more adult role than they feel ready for, or strive for meaningful connection and communication with their sibling and parents. Although the energy of clinicians, teachers, and other professionals working with individuals with autism spectrum disorder is often focused intensively on the child who is diagnosed, the practitioner can also be an invaluable resource for the child’s family. Drawing upon clinical research and firsthand family interviews, this book helps clinicians understand the experiences of parents and siblings of a child with ASD from the time of diagnosis through adulthood. It provides clear recommendations for sensitive, informed professional support. Step-by-step in each chapter, Fiske elucidates such vital subjects as: Understanding the experience of diagnosis Recognizing patterns of parent stress over time Appreciating and navigating the effects of ASD on relationships between parents Involving and providing support for siblings Integrating grandparents and other extended family in care and treatment Understanding a family’s culture Identifying and developing effective coping strategies Building a strong rapport with parents and family Guiding parents in the treatment of autism And many more, including key takeaways for assisting families in managing feelings of grief and guilt, navigating support options, treatment resources, and related financial concerns, and calibrating the division of labor in the home. Autism and the Family supplies all the foundations necessary for professionals to understand the full impact of ASD on the child, siblings, and parents and cultivate an empathic, supportive approach to treatment for the entire family.

This classic, coauthored by New York Times columnist and pediatrician Dr. Perri Klass, has been fully revised and updated to reflect the recent significant changes in the recognition and care of children whose development doesn't go as expected. It includes new information about therapeutic interventions, managing co-morbidities, and getting support for children with developmental differences at school. Additional information included covers community resources, initiatives at hospitals, clinics, and even theme parks, that make life easier for children with developmental differences and their families. The authors also offer a stronger focus on self-care for parents in this new edition, with the pediatrician’s perspective of supporting families as they go through the diagnostic process over time.

This practical guide provides a framework and useful techniques for helping bereaved youth in numerous settings. This welcomed addition to the field of childhood bereavement is brimming with innovative yet practical interventions for human service professionals helping grieving youth in a variety of settings. Written by noted experts with over 40 years of combined experience, this comprehensive “how to” book provides both a framework for understanding how grief impacts the lives of children, and models, techniques and interventions for individual, family, and group counseling. The book is based on best practices and the authors experience working with grieving families. It includes hands-on tips for interacting with and helping grieving children. Specific guidelines are provided for individual and group support including practical methods for creating meaningful spaces for young people to find help, encouragement, and healing. The book’s developmental, environmental, cultural, and social considerations equip professionals with the tools to better understand the mental, emotional, physical, and spiritual reactions of their young clients. Additionally, the book offers insightful information on
Where To Download Understanding And Supporting Children With Emotional And Behavioural Difficulties

professional accountability, ethical concerns, educational recommendations and training. Professionals who work with bereaved children daily and those who occasionally encounter them in their practice will find a wealth of resources in this book. Key Features: Brimming with innovative, practical interventions to support grieving children and teens Provides individual, family, and group counseling models, techniques, and interventions Embodies strategies for working with bereaved youth that can be used in a variety of settings, including mental health, health care, schools, and faith communities Offers a framework for understanding how grief impacts the lives of children

What are schemas and why do they matter? Again! Again! provides an introduction to understanding and supporting schemas and schema play in young children. Practitioners will find an overview of schemas with guidance on where they fit within the EYFS. There are examples of schemas, with illustrations and descriptions of common behaviour patterns, and these are set within the general context of child development. The intention is to help early years practitioners identify schemas and to understand both how important they are and the vital role they play in the growing child's learning. The aim is to help the reader understand how they can develop, plan and resource activities which support children's learning through experiment and play.

In times of increasing pressure on schools and teachers, it is essential that teachers are equipped to understand the emotional and relational factors in learning and teaching. Vulnerable and disaffected children need understanding and nurture rather than reactive management, which can easily exacerbate their difficulties, leaving them unheard and defensive, and even undermine teacher confidence and effectiveness. Understanding, Nurturing and Working Effectively with Vulnerable Children in Schools offers a comprehensive and accessible exploration of the difficulties faced by teachers and schools from at-risk and disaffected children, including repeated trauma and insecure attachment patterns. The book describes how a thoughtful 'relationship-based' approach can both alleviate such difficulties and offer a second chance attachment experience, enabling students to discover it might be safe to let down their all consuming defences a little; thus freeing them to begin to learn. It offers: practical suggestions in note form – making them easy to use, refer to and assimilate; numerous case examples and teacher friendly theoretical background material; a wealth of ideas for ways forward, including differentiated responses to children in the light of their particular patterns, developmental stages and unmet needs. Written from extensive professional experience, this is an essential handbook and resource book for trainers, schools, teachers and school staff, and also for educational psychologists and those in children's services working with vulnerable children in pre and primary schools, as well as those in special schools and units.

This accessible book offers essential guidance and practical ideas for Early Years staff to support children with social, emotional and mental health (SEMH) needs. It draws upon a wealth of experiences and insights to explore what SEMH is, why children may have SEMH needs, and what this can look like, giving practitioners the confidence they need to understand early signals and signs. Chapters share practical tools, activities and strategies, exploring topics that include: environment routines and transitions sensory experiences feelings and emotions the role of the adult. A range of case studies and resource suggestions are woven throughout, bringing the theory alive with first-hand advice from a variety of professionals, including educational psychologists, play therapists and Forest School specialists. This book is a refreshing and practical guide, and an essential read for all Early Years practitioners looking to cultivate a supportive and compassionate environment.

Written by two practising clinicians, this book is designed as a guide for those who work with children. In clear, simple language it focuses upon some of the most common, yet often incapacitating difficulties which are frequently encountered by young children and adolescents.
After introducing and discussing different forms of therapy and treatment used in clinical work with children, the book provides a series of chapters, each dealing with a specific difficulty. Drawing upon recent research findings, and employing detailed case illustrations, it seeks to help the reader to understand the nature of each problem and offers a guide as to how the child in difficulty can best be helped. The book is designed to be of particular value to those working in education, social work, health and child-care settings, and anyone who needs to be able to recognize and help children in difficulty.

How should teachers and parents react when a child consistently does not speak in certain situations when speech is expected, for example in kindergarten or school? In this book, the author has tried to reach an understanding of selective mutism. Her approach has been twofold: Firstly, she has observed everyday interactions between children with selective mutism and other children and adults in kindergartens, schools, and homes. Secondly, she has interviewed formerly selectively mute adults, selectively mute children themselves, and their parents and teachers. What seemed to be the meaning of silence from the child's own perspective and from the perspectives of other children and adults? How did teachers succeed in encouraging communication and including selectively mute children? And what characterised interactions that did not help children to begin to speak and participate in kindergarten and school? The intended audience of this book is teachers in kindergartens and schools, professionals in the helping services, researchers, students, and parents.

Supporting Children’s Learning in the Early Years is aimed at early years practitioners who are developing their knowledge and understanding of professional practice through studying at undergraduate level. The book encourages readers to consider their professional development as reflective practitioners, building on and supporting the government agenda to provide quality provision for young children and their families. Combining theory and practice, and bringing together current research and thinking in a broad range of areas, the book covers: Learning environments: young children as learners, assessment of learning, well being and children’s rights, diversity and inclusion. Learning and development: children’s development including social and emotional development, literacy and mathematical development, the potential of ICT, fostering creativity, musical development and knowledge and understanding of the world. Reflective practice: the learning environment, safeguarding and wellbeing, the reflective practitioner. Throughout, the contributions in this book encourage the reader to consider the diverse range of experiences which young children bring to early years and early primary settings and suggest ways in which they can be supported. The book will also be a valuable and unique resource for training providers of a range of courses at further and higher education level that prepare people to work with, and lead in, early years settings in the UK.

Supporting Traumatized Children and Teenagers is an accessible, comprehensive book providing an overview of the impact of trauma on children and adolescents and how they can be supported following trauma. Trauma can result from a range of experiences from bullying to witnessing violence to living through war. This book explores the different reactions children may experience, and the impact trauma can have. Variables affecting the impact of trauma are explored such as different developmental stages, gender, the reactions of friends and parents, the child’s personality, and their caring environment. Appropriate and effective ways of helping children after a traumatic event are outlined, and different types of therapy, such as group therapy and cognitive
Where To Download Understanding And Supporting Children With Emotional And Behavioural Difficulties

behavioural therapy, are discussed. The book offers case examples and practical tips throughout, and includes a chapter on how someone working with a traumatized child can help and look after themselves. This book will be invaluable to a range of professionals working with traumatized children including counsellors, child and family social workers and therapists, as well as others involved with traumatized children such as foster carers and teachers.

With widespread testing and standards-driven curriculum and accountability pressure in public schools, teachers are expected to be highly skilled practitioners. There is a pressing need for college faculty to prepare current and future teachers for the demands of modern classrooms and to address the academic readiness skills of their students to succeed in their programs. The Handbook of Research on Literacy and Digital Technology Integration in Teacher Education is an essential academic publication that provides comprehensive research on the influence of standards-driven education on educators and educator preparation as well as the applications of technology for the preparation of teachers. Featuring a wide range of topics such as academic success, professional development, and teacher education, this book is essential for academicians, educators, administrators, educational software developers, IT consultants, researchers, professionals, students, and curriculum designers.

This is a comprehensive guide to this group of ill-defined, often unrelated disorders, which can cause children to become disruptive both in the school and at home. The text examines the potential causes of both emotional and behavioural problems.

Life transitions differ concerning the intensity of the change and the intensity of the child’s reaction to that change. For most children, the first and most significant transition is from the family home to an institution of early care and education, which includes preschool. These transitions can also include children's passage from kindergarten to elementary school. However, the intensity of the child's reaction is related to the size of the change that is happening and also to who or what is involved in that change and the importance a child attributes to that someone or something.

Supporting Children’s Well-Being During Early Childhood Transition to School is an essential scholarly publication that examines evidence-based practices and approaches that fully support a child’s well-being during transition periods in early childhood. It serves as a resource to rethink contemporary transition theoretical models, research studies, and applied practices. Featuring a wide range of topics such as emotional competency, language learners, and professional development, this book is ideal for academicians, psychologists, early childhood educators, daycare centers, curriculum designers, policymakers, researchers, education professionals, and students.

Self-harm and suicidal behaviours are increasingly common in young people, but are often hidden. It can be hard to know what might be causing a young person to self-harm, and how to help and support them. Practical and easy to read, A Short Introduction to Understanding and Supporting Children and Young People Who Self-Harm guides the reader through what self-harm is, how to recognise it, and how best to respond. It combines case studies with professional and practical advice, covering all aspects from warning signs and treatment to communication and how the family is affected. The book also emphasizes the importance of parents and carers seeking support for themselves. This book is an invaluable source of information and guidance for parents, teachers, youth workers, and others who care for a young person showing
signs of self-harm or suicidal behaviour.
This comprehensive handbook is the ultimate reference work, providing authoritative
and international overviews of all aspects of schools and schooling in Asia. Split into 19
sections it covers curriculum, learning and assessment, private supplementary tutoring,
special education, gender issues, ethnic minority education and LGBTQI students in
Asian schools. The volume displays the current state of the scholarship for schools and
schooling in Asia including emerging, controversial and cutting-edge contributions using
a thematic approach. The content offers a broad sweep of the region with a focus on
theoretical, cultural and political issues as well as identifying educational issues and
priorities, such as curriculum, assessment, teacher education, school leadership, etc.,
all of which impact students and learning in multiple ways. The Routledge International
Handbook of Schools and Schooling in Asia brings together experts in each area to
contribute their knowledge, providing a multidimensional and rich view of the issues
confronting the region’s school and education systems.
This annotated bibliography, with descriptions of nearly 700 books representing more
than 70 countries, provides stories that will help children understand our differences
while simultaneously demonstrating our common humanity.
Set the tone for success and harness the power of school culture to boost achievement
with this user-friendly, one-stop resource.
Understanding Family Support provides a definition of family support and a clear
perspective on the role that it has in promoting the welfare of children and their families.
Family support is a concept that has been used in a range of ways to describe various
aspects of child welfare policy and practice. The authors argue that this weakens family
support as an overarching child welfare paradigm. They present a unifying definition of
family support along with ten principles and a series of reflective practice questions
applicable to: legislation and policy; organisation, management and planning; direct
work with children and families; and research and evaluation. This is an important
resource for any professional engaged in policy development, service design, delivering
or evaluation of family support, including social workers, residential care staff,
community development workers, teachers, community police, human services
managers, evaluators and policy makers.
Contains several tip sheets, giving child-care professionals ideas for putting Learning &
Growing Together concepts into practice to improve their program’s and staff’s ability to
support families. Each tip sheet aims to assist staff working in diverse settings and
roles, including center-based settings, home visits, and staff development.
School transition is a life changing event for children - they are rarely faced with such a
powerful set of personal and social changes. These underpin the immediate and longer
term wellbeing of children, peer groups, teachers and schools. Understanding School
Transition provides a most comprehensive, international review of this important area,
complete with practical advice on what practitioners can do to support children’s
wellbeing, motivation and achievement. Offering an accessible introduction to
children’s psychology at transition, Understanding School Transition explores transition
as a status passage, what we really mean by wellbeing, and the ways in which children
adapt to new environments. Key chapters focus on: Understanding stress and anxiety
Children’s hopes, fears and myths at transition Parents’ and teachers’ influence and
role Children’s relationships with peers as they change schools Children’s personal
and collective identities Motivation, engagement and achievement Supporting the most vulnerable children Crucially, it advises how you can help children through implementing transition interventions and evaluating their success in your own school. Illustrated by case studies of experiences in real schools, Understanding School Transition will be essential reading for all training and practising teachers, as well as transition and subject specialists, who want to better understand and influence what happens to children at this critical stage. The toddler whose tantrums scare all the other kids on the playground . . . The three-year-old who ignores all his toys but seems passionately attached to the vacuum cleaner . . . The fourth-grade girl who never gets invited to a birthday party because classmates think she’s “weird” . . . The geek who is terrific at math, but is failing every other subject. Quirky children are different from other kids in ways that they—and their parents and teachers—have a hard time understanding or explaining. Straddling the line between eccentric and developmentally impaired, quirky children present challenges that standard parenting books fail to address. Now, in Quirky Kids, nationally known writer/pediatrician Perri Klass and her colleague Eileen Costello, a seasoned pediatrician with a special interest in child development, finally provide the expert guidance and in-depth research that families with quirky children so desperately need. A generation ago, such children were called odd ducks or worse. But nowadays, they are often assigned medical, psychiatric, or neurological diagnoses. The diagnoses often overlap or shift, but the labels can be frightening. Klass and Costello illuminate the confusing list of terms applied to quirky children these days—nonverbal learning disability, sensory integration disorder, obsessive-compulsive behavior, autistic spectrum disorder, pervasive developmental disorder, Asperger’s syndrome—and explain how to assess what exactly each diagnosis means and how to use it to help a child most effectively. Quirky Kids takes you through the stages of a child’s life, helping to smooth the way at home, at school, even on the playground. How do you make it through mealtime, when emotions often erupt? How do you help the child’s siblings understand what’s going on? Is it better to “mainstream” the child or seek a special education program? How can you make a school more welcoming and flexible for a quirky child? How do you help your child deal with social exclusion, name-calling, and bullying? Choosing the right therapy for quirky children is especially difficult, because their problems fall outside traditional medical categories. Coping strategies might include martial arts or horseback riding, or speech and occupational therapies. Klass and Costello cover all the options, as well as offer a thorough consideration of the available medications, how they work, and whether medication is the best choice for your child. Drs. Klass and Costello firmly believe that the ideal way to help our quirky kids is to understand and embrace the qualities that make them exceptionally interesting and lovable. Written with upbeat clarity and informed insight, their book is a comprehensive guide to loving, living with, and enjoying these wonderful if challenging children. From the Hardcover edition. Starting from the premise that no two individuals with Asperger Syndrome are the same, Hudson and Myles provide a global perspective of how the core characteristics of AS may appear separately and/or simultaneously, and how they may manifest themselves in a variety of situations. Each characteristic is then paired with a brief explanation, followed by a series of bulleted interventions.
Interventions include strategies and visual supports that help children on the spectrum who have difficulty with abstract concepts and thoughts, difficulty understanding and regulating emotions, difficulty recognizing, interpreting, and empathizing with the emotions of others and much more.

Understanding and Supporting Children with Emotional and Behavioural Difficulties

Jessica Kingsley Publishers

Learn how to reach children who need special help. Almost anyone who works with 3- to 6-year-olds knows what it feels like to spend time with youngsters who are particularly puzzling or hard to help. When Young Children Need Help examines how early childhood educators can make sense of what is going on for such children and then use that understanding to help promote growth and mastery. Written for child care center staff, family child care providers, preschool teachers, and pre-service teachers, this book can be useful to any adult who wants to learn more about reaching the most troubling children in his or her care.

When Young Children Need Help provides a framework for understanding a range of emotional, behavioral, and developmental challenges. It explores a process through which early childhood teachers and providers can translate their growing understanding of a child’s difficulties into sensible goals for intervention. The author lays out practical strategies that help kids connect and communicate with ease, focus their attention, manage their bodies and their feelings, engage in constructive problem-solving, and experience themselves as successful friends and learners. The book suggests approaches for collaborating with parents and other caregivers and emphasizes that even when a child needs outside services and supports, what goes on in school or care remains central to making progress. Ranging from the classroom to the playground and back again, When Young Children Need Help offers its perspectives and strategies through highly engaging stories that bring challenging kids alive in all their quirky uniqueness.

Learning to read is arguably the single most important educational challenge a child faces in the first years of schooling, setting a child up for future academic success and opportunities. However, it is estimated that one in six children experience literacy difficulties. This is the go-to book for psychologists, educationalists and other professionals wanting a deeper understanding of current thinking around dyslexia, reading comprehension difficulties, and related SpLDs. Drawing on six fictional case studies to illustrate her points, and using examples of good practice throughout, Valerie Muter unpacks the latest psychological theories and research on literacy disorders. She discusses the interconnections between underlying cognitive problems and learning and educational and behavioural issues, as well as the common co-occurrence of these conditions. This authoritative book also provides accessible guidance on making assessments and tailoring interventions within the home or school.

Written by a lead thinker in the field, this is an essential evidence-based guide for those working with children with literacy difficulties and supporting them to achieve their full potential.
First released in the Spring of 1999, How People Learn has been expanded to show how the theories and insights from the original book can translate into actions and practice, now making a real connection between classroom activities and learning behavior. This edition includes far-reaching suggestions for research that could increase the impact that classroom teaching has on actual learning. Like the original edition, this book offers exciting new research about the mind and the brain that provides answers to a number of compelling questions. When do infants begin to learn? How do experts learn and how is this different from non-experts? What can teachers and schools do—with curricula, classroom settings, and teaching methods—to help children learn most effectively? New evidence from many branches of science has significantly added to our understanding of what it means to know, from the neural processes that occur during learning to the influence of culture on what people see and absorb. How People Learn examines these findings and their implications for what we teach, how we teach it, and how we assess what our children learn. The book uses exemplary teaching to illustrate how approaches based on what we now know result in in-depth learning. This new knowledge calls into question concepts and practices firmly entrenched in our current education system. Topics include: How learning actually changes the physical structure of the brain. How existing knowledge affects what people notice and how they learn. What the thought processes of experts tell us about how to teach. The amazing learning potential of infants. The relationship of classroom learning and everyday settings of community and workplace. Learning needs and opportunities for teachers. A realistic look at the role of technology in education.

Drawing directly from real classroom experience, this book shows how to use effective management strategies to improve behaviour in the classroom and at home. This interdisciplinary approach will provide teachers with: [1] strategies to deal with disruptive behaviours, [2] ways to channel children's positive characteristics, [3] advice on how teachers can support and guide parents, [4] behaviour management techniques to promote positive behaviour, [5] advice on collaborative working, and how teachers can build partnerships with other professionals.

The quintessential guide that gives parents the tools they need to understand and support a child with OCD Parenting Kids With OCD provides parents with a comprehensive understanding of obsessive-compulsive disorder, its symptoms, types, and presentation in children and teens. The treatment of OCD is explained, and guidelines on how to both find appropriate help and best support one's child is provided. Family accommodation is the rule, not the exception, when it comes to childhood OCD; yet, higher accommodating is associated with a worsening of the child's symptoms and greater levels of familial stress. Parents who have awareness of how they can positively or negatively impact their child's OCD can benefit their child's outcome. Case examples are included to illustrate the child's experience with OCD and what effective treatment looks like. OCD.
worsens when there is increased stress for the child; therefore, stress management is an essential component for improvement. Parents will learn how to manage stress in themselves and encourage effective stress management for their children.

Provides introduction to range of ideas, arguments & perspectives about ways of understanding & supporting learners who are considered to have MLD. Much-needed source of knowledge for teachers, TAs, SENCOs, Learning Mentors & anyone who supports children & young people with moderate learning difficulties & provides an honest, accessible approach.

Guides parents through a step-by-step "profile-based" approach to discovering what issues or disorders--if any--exist in children displaying puzzling behaviors, and how to create appropriate interventions to deal with them.

'This book provides a succinct overview of issues relevant to understanding and supporting pupils with ADHD. It is well written and includes authentic case studies... The real strength of the book is in its careful consideration of how collaborative working can enable youngsters with an ADHD diagnosis to get the best out of their education. Ideas outlined are practical but are also based on careful thinking about effective models and approaches to intervention... an excellent starting point for anyone embarking on research related to educational provision for pupils with ADHD' - SENCO Update 'In many ways this publication reads like a toolkit, and as such offers a range of practices that may be considered in order to improve outcomes for all. A readable and supportive book' - SNIP Children with Attention Deficit Hyperactivity Disorder (ADHD) can be hard to include in a mainstream classroom, and managing their behaviour is often a challenge. Drawing directly from real classroom experience, this book shows how to use effective management strategies to improve behaviour in the classroom and at home. This interdisciplinary approach will provide teachers with: "strategies to deal with disruptive behaviours " ways to channel children's positive characteristics " advice on how teachers can support and guide parents " behaviour management techniques to promote positive behaviour " advice on collaborative working, and how teachers can build partnerships with other professionals.

Educators and parents alike recognize that children don't grow up simply by adding inches and pounds--child development is a much richer mix of physical, cognitive, social, and emotional growth. Though children make progress at their own pace, educators can help them on their individual paths. Understanding the many ways in which children grow forms the essence of good teaching. If you appreciate the ebbs and flows of development, you can teach children with more insight and confidence, and offer support and guidance to their parents and caregivers. Problems can arise, of course, in every child's life. Dr. Mayes's reassuring approach helps educators understand the nature of a problem, how they can address it, and when and where to go for help with concerns such as learning disabilities, bullying, sibling rivalry, depression, anger, and other difficult
Where To Download Understanding And Supporting Children With Emotional And Behavioural Difficulties

feelings. This guide will be an incredible resource on every educator's bookshelf. Self-harm and suicidal behaviors are increasingly common in young people, but are often hidden. A Short Introduction to Helping Children and Young People Who Self-Harm aims to show parents, caregivers and professionals how they can support young people through these difficult times, as well as how to find specialist professional help. The author uses an easy-to-read, jargon free and positive approach to tackle the stigma attached to self-harm and suicidal behavior. This book combines case studies with professional advice to help the reader take the first steps towards helping the young person in need. It advises on how to distinguish between normal adolescent behavior and the signs of mental health problems, while showing how an adult can sensitively communicate with a teenager about the difficult subject. The book also emphasizes the importance of parents and caregivers seeking support for themselves. This book will be an invaluable resource for parents, teachers, youth workers, and others who care for a young person showing signs of self-harm or suicidal behavior.

Decades of research have demonstrated that the parent-child dyad and the environment of the family are at the foundation of children's well-being and healthy development. From birth, children are learning and rely on parents and the other caregivers in their lives to protect and care for them. The impact of parents may never be greater than during the earliest years of life, when a child's brain is rapidly developing and when nearly all of her or his experiences are created and shaped by parents and the family environment. Parents help children build and refine their knowledge and skills, charting a trajectory for their health and well-being during childhood and beyond. The experience of parenting also impacts parents themselves. For instance, parenting can enrich and give focus to parents' lives; generate stress or calm; and create any number of emotions, including feelings of happiness, sadness, fulfillment, and anger. Parenting of young children today takes place in the context of significant ongoing developments. These include: a rapidly growing body of science on early childhood, increases in funding for programs and services for families, changing demographics of the U.S. population, and greater diversity of family structure. Additionally, parenting is increasingly being shaped by technology and increased access to information about parenting. Parenting Matters identifies parenting knowledge, attitudes, and practices associated with positive developmental outcomes in children ages 0-8; universal/preventive and targeted strategies used in a variety of settings that have been effective with parents of young children and that support the identified knowledge, attitudes, and practices; and barriers to and facilitators for parents' use of practices that lead to healthy child outcomes as well as their participation in effective programs and services. This report makes recommendations directed at an array of stakeholders, for promoting the wide-scale adoption of effective programs and services for parents and on areas that warrant further research to inform policy.
and practice. It is meant to serve as a roadmap for the future of parenting policy, research, and practice in the United States.
